

# Memory Match

(Skill Review)

<b>Time:</b>	15 -20 minutes
<b>Supplies:</b>	Set of memory match squares (Cheat Sheet for facilitator)
<b>Layout:</b>	Open area- make a physically distanced grid with the memory squares- words down.
<b>Basic Description:</b>	Divide into to two teams. Teams take turns flipping two squares at a time. If they find a match, they keep it. Team that has the most matches win.
<b>Note:</b>	The squares will not match identically. They must match the skill with the explanation. You can allow them to match “wrong” as long as they can tell you why they think they match, then when all is done, find the appropriate matches and then reflect.
<b>Reflection Questions:</b>	This is meant to be a review. Have everyone take a square at the end and talk about what they have learned about the subject.
