

G.I.Q. (Group Identity Quotient) Group Name _____

(This is worth 10 points.)

Directions: Carefully read each statement below to determine the number of points your group can score and write the number in the points column. When your point column is filled up, add all individual points together for your groups Total Points – fill this number in the blank provided. Keep in mind that you might be asked to “prove/justify” any one of the characteristics to the official judge. If you are not sure about the requirements for the objective, ask a judge to clarify or you may lose points.

Example: One point for each brother and sister. If Tim has 2 brothers, Mary has 1 sister and 1 brother, Sue has 4 brothers and 1 sister, Bob has 2 sisters, and Kim is an only child, the group scores 11 points.

One point to each player:

For every brother and sister. Points: _____
